- **We work flexibly, tell us how we can support you to be successful in this role**
- **With exposure to a range of key stakeholders, grow your career with us today!**

About Woolworths Format Development

The Woolworths Format Development Team are a diverse national team of 650+, responsible for developing retail experiences of the future. We're architects and sustainability people. We're planning & commercial people. We're construction people, facilities and asset management people. We're data analysts, refrigeration and air conditioning people. We are operations and training people. Together, we're doing our part to bring fresh food and great experiences to our customers everyday.

We **design** through creating experience-centric technology-led, retail store formats that are purpose built for our customers and teams. We **innovate** by focusing on Continuous Improvement, sustainable energy management, technology, and working with our suppliers, service providers and operations teams to move towards a healthier planet. We **maintain** all aspects of our supermarkets stores through having highly specialised, skilled team members across all trades. Every decision we make is designed with our customers and teams at the heart.

About the role

This role will see you join one of the refrigeration industry's most capable and innovative teams to install and implement cutting edge plant and equipment in to our new and refurbished stores. You will be part of a team responsible for ensuring that Woolworth's refrigeration assets are installed, commissioned and available to sell products to team and customers.

This role will also see you:

- Provide engineering designs, cost estimations and construction drawings for multi-million dollar projects
- Use Autocad and eventually Revit, to develop construction drawings from concept through to completion.
- Establish the scope and specifications of contracts for tender submissions
- Work with key project stakeholders and provide advice on project costings

What we're looking for

If you're the sort of individual who is proactive, organised, customer focused, always looking to improve, and the following sums you up then we would love to hear from you:

- You're a Mechanical Engineer or Refrigeration Engineer with exposure to drafting and cost estimation for projects
- You have good knowledge and experience using Autocad
- You have engineering experience working on heat load or have studied thermodynamics
- You have tertiary qualifications in Mechanical Engineering or a Refrigeration Engineering Diploma OR you may have Trade Qualifications in Refrigeration with exposure to drafting and engineering

- It would be great, but not essential if you had experience in Revit, MEP and commercial project experience on a large scale

Why you'll love it here

- Team member discounts across Woolworths brands
- An attractive remuneration package including base + super
- An exciting career - as our business grows, so do the opportunities for our people

We are driving inclusion and diversity as Ways of Working. If you meet a number of requirements (and not all), we encourage you to submit your application.
